Note: Because of the COVID virus situation, fewer candidates were able to take PA-CAT during this period than planned. Therefore, individual percentile rankings are not included in initial reports. However, for reference, an early norm table of quintile rankings, subject to change, is provided for reference. This early norm table will provide useful comparisons of individual performance against the total cohort of PA-CAT examinees to date, and until such time that sufficient data exists to provide individualized candidate percentile rankings.
